# wherever you flow

Fantastic views of mountains and valleys.  
Snow crunching under your skis. Perfect groomers,  
as far as the eye can see.

# wherever you explore

Carving the first turns on an untracked slope.  
Looking for new adventures.

# wherever you seek new challenges

Legendary ski runs. Awesome jumps.  
Gaining ground and breaking records.

# wherever you ride

Victor Muffat-Jeandet

Powder or piste. Fast downhill runs or hard-earned ascents. With their sophisticated designs, innovative technology and unbeatable safety features, uvex ski helmets and ski goggles are with you all the way.

For exceptional protection, 24/7, 365 days of the year – uvex is the go-to choice. Wherever you ride.

wherever  
you ride

performance collection

## performance collection

Slalom, downhill, or super G. Pro skier or ambitious amateur. Sometimes it's all about split seconds.

The uvex performance collection is made for unique experiences on steep and difficult runs. With no-compromise, race-ready designs and optimized climate management, this collection will appeal to the performance-driven skier. Take the uvex JAKK+ IAS for example – a high-tech, 2-in-1 helmet for high-speed downhills and high-performance slaloms.

Or the uvex downhill 2000 CV – one of a range of performance ski goggles with innovative technology that helps you to master every type of terrain and weather situation. Whether it's snowing, sunny, or stormy, the uvex performance collection will help you achieve your personal best on any piste.

## uvex race+

Optimized in the wind tunnel, made for the racetrack. The uvex race+ is the ergonomically shaped, ultralight racing helmet trusted by uvex athletes all over the world. Whether for negotiating slalom gates or in the super G, this is the helmet for maintaining speed and safety.

adult helmets

## adult helmets

Fine powder or hardpack. With a uvex ski helmet, there's no limit to the fun on the mountain. High-end technology comes as standard. Like the uvex 600 visor V with its uvex variomatic® self-tinting visor that transitions from light to dark in a matter of seconds.

The uvex legend pro teams an ultra-cool design with the legendary uvex fit – and a totally new ventilation system. The feature set also includes a Coolmax® lining and a Fidlock® quick-release buckle. The helmets are available in a range of vibrant colors and with contrasting detailing, to bring a touch of style to fun days out in the big, white world.

## uvex ultra pro

Ultra-elegant, ultra-safe, ultra pro. The uvex ultra pro helmet occupies a class of its own. Its hybrid construction combines the best of two worlds – technology and design. The glossy inmould shell is ultralight while the matte hardshell guarantees ultimate style and impact resistance. An actively adjustable ventilation system, the functional lining, and the IAS fitting system ensure maximum comfort at all times. All in all: ultra-good.

# german engineering

The uvex winter sport collection has been setting new standards for more than 90 years, thanks to innovative technologies and outstanding product design. For high-speed skiing. For every weather. For family ski trips. For the winners' podium.

The new uvex legend all-mountain helmet combines the know-how of ski cross athletes with direct feedback from our customers – developed in collaboration with performance freestyle skiers like Paul Eckert and rigorously tested by experts. The result is a top-class product with record-breaking climate management and the latest ventilation technology. Naturally, it also conforms to the highest safety standards.

MADE IN GERMANY

**uvex legend pro**

28 months. 4 prototyping cycles. Numerous tests. Unique product design.

**Color contrast concept**  
Vibrant canyon orange combined with the muted green of the leaf mat color. Additional color combinations from page 34.

**IAS system**  
The fit adjustment dial at the back of the helmet has a star-shaped, ergonomic design that makes it extremely easy to operate – even when wearing gloves.

**Fidlock® buckle**  
Based on a one-of-a-kind technology, this multiple-award-winning magnetic buckle has revolutionized conventional fastener systems and can be operated with just one hand.

adult helmets

# uvex legend pro

Designed down to the smallest detail: premium quality, matte finish, a soft, warm lining, and highly practical features. The new color concept of the uvex helmet collection is particularly apparent in the new uvex legend pro. The contrasting orange detailing combines with the leaf green shell color to give an exceptionally stylish look.

The water-resistant ear flaps with leather-look straps and the innovative mesh padding provide added comfort and cold protection to promote optimal heat exchange. Deep air channels in the EPS shell regulate the internal temperature. The three large vents at the front ensure a constant flow of air, while the ventilation slider allows custom temperature regulation – for noticeably improved comfort.

## uvex legend pro

All-mountain redefined: the ultralight, Made-in-Germany uvex legend pro hard-shell helmet impresses with its striking heli-pilot design and a smart high-tech ventilation management system. With its 3D IAS system it is perfectly adjustable to the head in height and width. What the pro version also has to offer: contrast coloring, Coolmax® lining, magnetic Fidlock® buckle. The coolest equipment for the hottest rides.

## uvex jimm

The uvex jimm scores through understatement. Combined with stylish colors, its contours create a clean, sporty look. Assuring comfort are a sophisticated ventilation system and the 3D IAS system, which adjusts the height and width of the helmet to fit the head perfectly. Ideal for piste and powder.

## uvex fierce

With its fantastic fit, young design, and comfort lining, the uvex fierce scores in all categories. But that's by no means all: perfect climate management comes from active, closable air vents, and an ergonomically designed IAS system allows for individual adjustment in width of the helmet. In short: fresh style with big comfort.

kids helmets

## kids helmets

From ski kindergarten to junior race days, children need the best possible head protection. A good ski helmet and a good pair of goggles are a given.

A correct, child-friendly fit, functionality, comfort, precision adjustment, and the highest safety standards are absolutely crucial. And that's exactly what you get with the uvex kids collection.

## uvex heyya pro set

So safe and so cute. The new uvex heyya pro set provides optimal protection with minimal weight for young skiing stars. Adjusting the helmet individually with the IAS system to fit different widths is child's play and ensures a perfect fit. It is supremely comfortable thanks to the anatomically optimized lining and strap design. A perfect match for its cool look: the uvex flizz LG children's ski goggles. Maximum protection and a perfect view for young skiers.

- Reduces signs of fatigue for the eyes
- For a balanced viewing experience

uvex supravision®

- 200% anti-fog (vs. norm)
- 100% UVA, UVB, UVC protection
- Break-resistant for maximum protection

lens technologies

# lens technologies

Fast descents. Challenging runs. With the uvex lens technologies, you get a clear view of every bump and snowbank.

uvex colorvision® technology ensures ultimate contrast enhancement and maximum color perception – and makes even the most difficult slopes a unique skiing experience. The uvex variomatic® lenses are self-tinting, with rapid and automatic adjustment of the lenses' light transmission. Ski goggles with uvex polavision® provide reliable protection from glare and reflection. All uvex ski goggles benefit from the uvex supravision® coating technology, to ensure clear, fog-free vision – a crucial attribute on sporty runs and demanding terrain.

## uvex downhill 2000 CV

Super styling meets peak performance – the uvex downhill 2000 CV is the top sporting model with an extra-large field of view and uvex supravision® anti-fog coating. Innovative uvex colorvision® technology intensifies contrast beyond compare – for an unrivalled visual experience on and off the piste. A fresh design for these iconic ski goggles.

kids goggles

## kids goggles

From the nursery slope to the first day on the big pistes, junior skiers need the right equipment. A helmet and a pair of high-quality goggles are an absolute must. Because children in particular, from kindergarten kids to teenagers, need proper eye protection.

The ski goggles in the uvex kids collection – like the uvex speedy pro, for example – have a special, child-friendly fit and provide the effective protection that children's eyes need. Wherever they ski.

## uvex flizz FM

These are the sportiest children's ski goggles on the piste. With their angular design, the uvex flizz FM makes junior skiers look like young pros. A full-mirror lens with anti-fog coating to prevent condensation ensures an optimal view on every adventure in the snow. The lens also reliably shields children's eyes, offering 100% protection against UVA, UVB, and UVC rays.

## uvex flizz LG

The sportiest children's ski goggles on the piste. With their angular design, the uvex flizz LG goggles make junior skiers look like young professionals. The lasergold double lens reliably protects children's eyes against harmful UVA, UVB, and UVC rays and with anti-fog coating guarantees condensation-free vision at all times. The perfect model for cool kids.

### Features

- 100% UVA, UVB, UVC protection
- uvex supravision® lens technology
- Double lens (cylindric)
- Foam membrane
- Single foam
- Basic strap
- Easy to clean

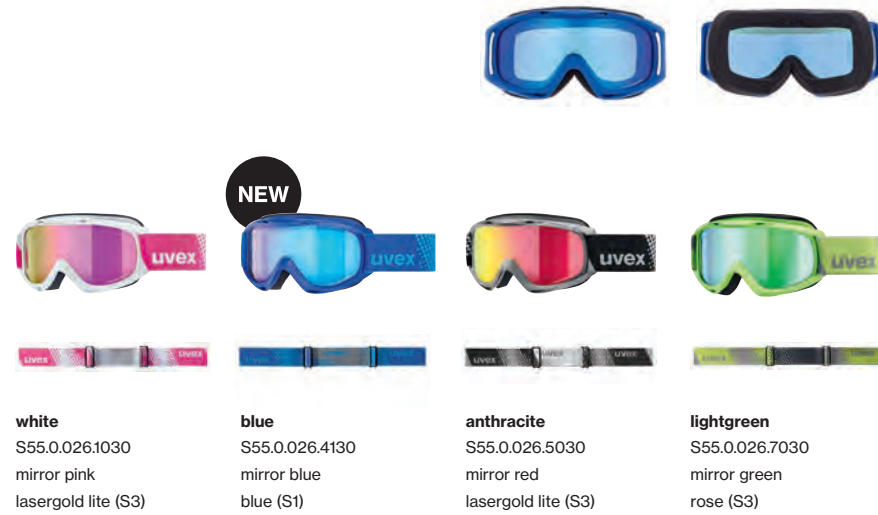

## uvex slider FM

Mirror, mirror ... With its full-mirror lens, the uvex slider FM is a real eye-catcher. It reliably protects sensitive children's eyes against UVA, UVB, and UVC rays. The cylindrical double lens with a wide field of vision and anti-fog coating ensures ideal and condensation-free vision at all times.

### special OTG engineered

#### Features

- 100% UVA, UVB, UVC protection
- uvex supravision® lens technology
- Double lens (cylindric)
- Foam membrane
- Single foam
- Over the Glasses (OTG)
- Direct frame ventilation
- Basic strap

## uvex slider LGL

Young skiing stars definitely need the uvex slider LGL as they swoop over the slopes even in suboptimal weather conditions. These children's ski goggles feature a contrast-enhancing double lens with anti-fog coating to provide superhero levels of vision, even when visibility is poor.

### special OTG engineered

#### Features

- 100% UVA, UVB, UVC protection
- uvex supravision® lens technology
- Double lens (cylindric)
- Foam membrane
- Single foam
- Over the Glasses (OTG)
- Direct frame ventilation
- Basic strap
- Easy to clean

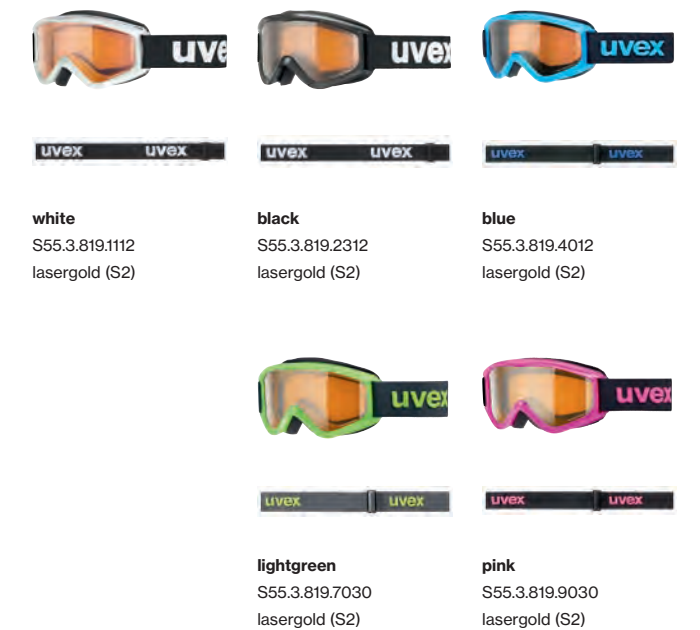

## uvex speedy pro

Small children will feel thoroughly at home with the uvex speedy pro. It reliably filters harmful UVA, UVB, and UVC rays, ensures super visibility with its anti-fog coating, and is available in five cool colors. Your kid's first pair of ski goggles simply has to come from uvex.

#### Features

- 100% UVA, UVB, UVC protection
- uvex supravision® lens technology
- Single lens (cylindric)
- Foam membrane
- Single foam
- Basic strap
- Easy to clean

## uvex snowy pro set

Take 12! The range of uvex snowy pro ski goggles comprises 12 models each with two colors options – ideal for junior ski courses or rental operations. The ski goggles reliably protect children's eyes against harmful UVA, UVB, and UVC rays. And on skiing courses their anti-fog coating reliably ensures a condensation-free view at all times.

### Features

- 100% UVA, UVB, UVC protection
- uvex supravision® lens technology
- Single lens (cylindric)
- Foam membrane
- Single foam
- Basic strap

eyewear

## eyewear

Ski tour or hut-to-hut. Mountain or valley. Wherever your adventure takes you.

The uvex eyewear collection provides all-round protection against sun, sun glare, wind, and snow. Intelligent technologies deliver optimized anti-fog performance, contrast enhancement, and automatic self-tinting. The perfect choice, wherever you ski.

## uvex sportstyle 706 CV V

The uvex sportstyle 706 CV V combines uvex colorvision® lens technology with the fully automatic adjustment of uvex variomatic® lenses (cat. 1–3). The durable eyewear for trail lovers delivers best vision in all light conditions, increased color brilliance, and more contrast.

### Features

- uvex colorvision® lens technology
- uvex variomatic® lens technology
- uvex supravision® lens technology
- Adjustable soft nose pads
- Soft and adjustable temple ends
- Direct lens ventilation
- 100% UVA, UVB, UVC protection up to 400 nm

## tech summary

### tested for safety

Anyone who wears a uvex helmet for winter sports travels on the side of safety. Each of our winter sports helmets undergoes rigorous tests in the uvex testing center.

**ski helmet standard**  
EN 1077:2007  
ASTM F 2040

**climbing helmet standard**  
EN 12492:2012

**European bicycle helmet standards**  
EN 1078:2012 + A1:2012

plus GS tested

The voluntary certification mark "GS" stands for "Geprüfte Sicherheit" ("tested safety"). More details on the test criteria are available at:  
[www.uvex.com/gs](http://www.uvex.com/gs)

### shell technologies

#### hardshell technology

An injection-molded outer shell and an EPS inner shell create a highly effective safety combination: impact-resistant on the outside, shock-absorbing and insulating on the inside.

#### hybrid technology

Advanced technology unites the durable hardshell construction of the upper helmet with the inmould process of the lower helmet. Numerous channels provide perfect ventilation.

#### inmould technology

Protective EPS material is injected directly into the polycarbonate shell to create a lightweight helmet with the highest impact resistance. A perfect fusion of polycarbonate outer shell and EPS inner layer.

### shell materials

#### PC

inmould  
Safety thanks to the securely bonded polycarbonate shell.

#### ABS

hardshell  
Proven technology with a hardshell for highly effective protection.

#### EPS

hardshell // inmould // hybrid  
Protective material made from microscopic air chambers which absorb the incident forces of an impact.

#### CFK

hardshell  
Polymer reinforced with carbon fiber for high-end helmets with low weight.

#### +technology

hardshell // hybrid  
Innovative, extremely light, and safer special polymer.

#### shell sizes

Perfect fit = head circumference + head shape. Whether large or small, rounder or squarer, the uvex range has the right shell size for every head with helmet sizes from 46 to 64 cm.

### ventilation

uvex places the highest value on optimal ventilation: cleverly designed ventilation channels draw in fresh air and expel warm air.

#### Fresh breeze

Front ventilation openings draw fresh air through built-in ventilation channels.

#### Closable ventilation system

Opened vents provide optimal cooling when it is warm, while closed vents keep the head warm and dry.

#### Cool head

Exhaust ports efficiently conduct warm air away.

### comfort

#### Coolmax® lining

Thanks to the excellent properties of the Coolmax® fabric, moisture is transported away from the body to the fabric surface. This keeps your head cool even on the wildest descent.

#### Fidlock® magnetic buckle

The Fidlock® magnetic buckle can be opened and closed with one hand thanks to its strong magnets, while the secure snap action ensures the best clamping force.

#### monomatic

The uvex monomatic comfort lock can be opened and closed with one hand.

#### uvex IAS

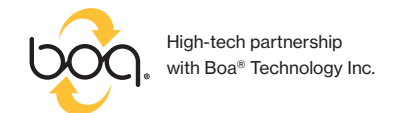

With the uvex IAS system, helmet width is quick and easy to adjust.

#### uvex 3D IAS

The uvex 3D IAS system offers the extra feature of precise adjustment to individual head height.

#### Boa®

The unique Boa® system is available in selected uvex helmets. It combines an ingeniously simple system with high-performance materials from the aerospace industry.

### fit systems

uvex has the best all-round package for the perfect fit – with a range of shell sizes and fit systems to adjust even the smallest detail.

## tech summary

### 100% UV protection

UV-absorbing filters built directly into the raw material completely protect the retina from damaging UV rays of up to 400 nm.

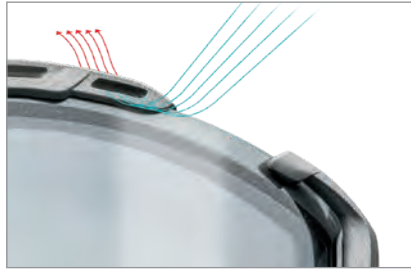

UV light  
(UVA, UVB, UVC)

visible light from  
780–380 nm

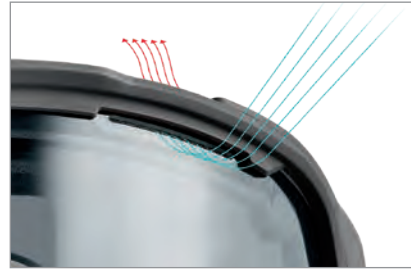

### break-resistant

uvex goggles are tested in accordance with DIN standard EN 174:2001. This includes the demanding impact test in which a 6 mm steel ball weighing 0.86 g is fired at the lens at a speed of 45 m/s (162 km/h).

### direct lens ventilation

Direct frame ventilation

Direct lens ventilation

uvex climate technology provides permanent draft-free ventilation, meaning that the field of view is always fog-free.

### comfort kits

uvex goggles are perfectly equipped for all needs. Four comfort kits guarantee an optimal fit – for maximum safety and superb comfort.

#### basic kit

- Foam face pads
- Adapts to facial contours, close fit, and draft-free
- Adjustable, stretchable goggle strap

#### extended kit

- Compression-molded foam face pads with soft velours cover
- Adapts to facial contours, perfect close fit, and draft-free
- Adjustable, stretchable goggle strap
- Anti-slip silicone grip for adherence to helmet shell
- Climate-regulating and waterproof

#### advanced kit

- Compression-molded foam face pads with soft velours cover
- Adapts to facial contours, close fit, and draft-free
- Adjustable, stretchable goggle strap

#### ultimate kit

- Compression-molded sandwich foam face pads with soft velours cover
- Adapts to facial contours, close fit, and draft-free
- Adjustable, stretchable goggle strap

### lens technologies

#### uvex supravision®

Under test conditions, the uvex core technology uvex supravision® provides up to 60 seconds of fog-free vision. For precise visibility and maximum safety.

#### uvex polavision®

Reliable protection against reflections and glare: polavision® lenses absorb scattered light and protect the eyes from strain.

#### uvex variomatic®

The uvex variomatic® technology ensures automatic lens tinting in any lighting condition. Like all uvex glasses, the lenses offer 100% protection against UVA, UVB, and UVC radiation.

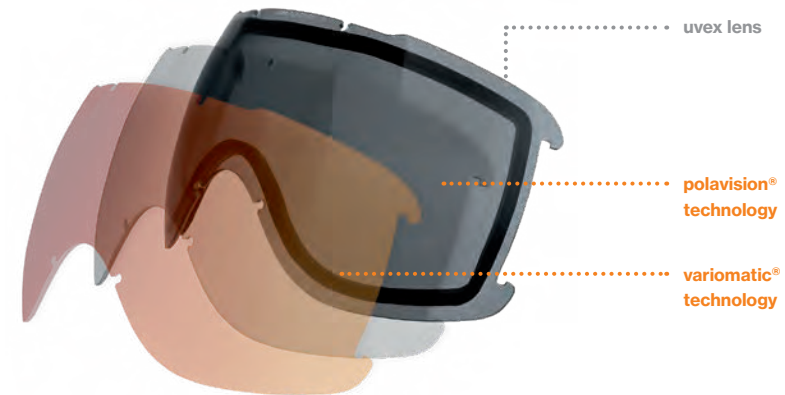

#### uvex colorvision®

The tinted uvex colorvision® lenses increase contrast and enhance the viewing experience in all visibility conditions.

vision with  
polavision®

vision without  
polavision®

**uvex variomatic® polavision® extended**  
variomatic® polavision® extended combines the advantages of two technologies in one lens. Thus, you are perfectly equipped for every light condition, and good vision is guaranteed.

#### Take Off

The interchangeable lens attaches to the goggle lens via magnets. It instantly transforms ski goggles for bright sun into ski goggles for bad weather.

#### robust and anti-scratch

Polycarbonate lenses work in temperatures down to  $-40^{\circ}\text{C}$  with no loss of mechanical strength. A special coating protects against scratches.

one  
brand.  
mission.  
one  
vision.

uvex products protect people at work as well as in sport and leisure. As a partner of international top-level sport, uvex equips over 1,000 professional athletes worldwide.

The transfer of knowledge between uvex safety and uvex sports makes our products even safer, more functional, and more comfortable – both product divisions benefit mutually from this collaboration. This was perfectly demonstrated at the Challenge Roth 2019, the biggest long-distance triathlon competition in the world: uvex safety provided equipment to the construction team and uvex sports equipped the athletes – that's what you call successful teamwork.
