uvex instinct visor pro V

The uvex instinct visor pro V is the sporty, striking solution for everyone who seeks the extraordinary. Cutting-edge style, uncompromising protection and maximum performance: thanks to the dynamic yet classic lines in the upper head area and the reduced rear, the uvex instinct visor pro V impresses with its particularly slim, super sporty fit.

The distinctive, anatomically designed visor can be easily regulated and promises draft-free vision at any speed – while the active ventilation system ensures an optimal climate in every situation. The luxe equipment includes the highly functional, climate-regulating COOLMAX® interior, which absorbs and quickly transports moisture to the outside – as well as the magnetic FIDLOCK buckle, which makes putting on and taking off the helmet a real breeze. High-quality alcantara inserts complete the all-round comfort: for an outstanding wearing sensation and a first-class look.

kids helmets

uvex rocket jr. visor

For the little ones on big days on the slope: with its mirrored visor, the uvex rocket jr. visor not only looks super-cool – thanks to its hardshell construction, it also provides uncompromising protection. The robust outer shell is impact-resistant, the inner EPS shell cushions and insulates. And the comfort padding with integrated neck warmer guarantees a super-comfortable fit.

The children's visor helmet fits perfectly with the extensive uvex visor helmet collection: it can easily keep up with the big ones in terms of functionality, design and technology. Fresh air constantly flows through the helmet's passive ventilation system so that no heat build-up occurs, even on the wildest descent. The large, slightly mirrored lasergold lite visor with a contrast-enhancing tint and uvex supravision® technology ensures fog-free vision. The perfect all-in-one solution for active kids.

NEW

adult goggles

uvex downhill 2100 CV

50 years of winter sports performance: the uvex downhill 2000 series' success story continues. Featuring a smart design update, the icon scores with an enlarged field of vision, a reduced frame and a further improved fit – especially around the nose. A true style statement: the athlete's favorite of the past 5 decades shows off a multitude of bold, iridescent mirrors. Also available in the trend colors of the winter season: croco and rhino.

Thanks to uvex supravision®, the extra wide field of vision and the spherical lens of the new classic remain fog-free. And the innovative uvex colorvision® technology ensures ultimate color and contrast enhancement. For unforgettable adventures on the slopes.

kids goggles

uvex scribble FM sphere

For cool kids: the new uvex scribble FM sphere impresses with its fully-mirrored, spherical double lens and 100 % protection against harmful UVA, UVB and UVC rays – perfect for sensitive children's eyes.

The eye-catching design and the large lens with an extra-wide field of vision not only look good: the uvex supravision® anti-fog coating ensures a fog-free view. Thanks to the child-friendly fit and smart design, the goggles are a perfect match for any helmet. Additionally, the ultra-soft comfort foam pad guarantees optimal wearing comfort and an optimal fit on the nose.
